

# STANDARD DIES

- Durable USA Steel
- Silver Metallic Paint
- Can be paired with stamp sets or hot foil dies, or standalone
- Papercrafting, cardmaking, scrapbooking
- Minimum Order: 1 Sheet

## 10% POLICY

Our standard practice is to ship orders within a 10% range of order quantities for each part. This means that if you order 100 dies, you can receive anywhere from 90 dies to 110. You will only be billed for the quantities that actually ship.

## COMPATIBILITY

Sizzix ® Big Shot® & Big Shot® Plus	YES
Sizzix ® Big Kick™	YES
Spellbinders Paper Arts® Platinum™	YES
Crafter's Companion™ Gemini & Gemini Jr	YES
We R Memory Keepers® Revolution™	YES
Cricut® Cuttlebug™	YES
Crossover I & Crossover II	YES
Diamond Press Marquise	YES
Sizzix® Vagabond™	YES
Sizzix® Sidekick™	YES
Cheery Lynn Designs Big Sister & Little Sister	YES
Standard Craft Paper & Cardstock	YES
Thin Craft Foam	YES
Thin Acetate Sheets / Window Plastic	YES

All of our standard paper dies are quality tested on 100# Cardstock. Compatibility may vary with older machines and thicker media. We recommend ordering 1 sheet of new designs to test with your own machines and media before placing inventory orders.

Alternative media not listed here may cut, but compatibility is not guaranteed.

*Cricut® is a registered trademark of Cricut, Inc.*

# CUSTOMIZATIONS

## CLOSED BACK DIES

Solid metal remains behind the entire die.

## OPEN BACK DIES

Excess metal is etched away on back of the die.

## NO DETABBING

All of our dies are detabbed and clipped out of the sheet before they are sent to you. If you would like individual pieces of the sets separated, Full Detabbing and Special Detabbing are available.

## FULL DETABBING

All pieces in a die set are separated completely.  
*15¢ per each additional piece*

## SPECIAL DETABBING

Only specific pieces in a set are selected to be separated from others.

*15¢ per each additional piece*

## MAGNETS

*49¢ each*

Add a thin metal shim to each die set to keep all pieces of a set together. Magnets are popular with detabbed sets or nesting dies. Magnets cannot be ordered without dies. See supplies information for magnetic shim prices.

# STANDARD DIE FAQ'S

## WHAT IS THE MINIMUM ORDER QUANTITY?

Our dies are manufactured per sheet, not per die. The **yield** - the number of dies per sheet - varies by design and is determined by our graphics team. The minimum order is only 1 sheet.

## HOW MANY DESIGNS CAN I PUT ON 1 SHEET?

Only 1 design (die or die set) is allowed per sheet. Multiple designs on the same sheet causes inconsistencies in our etching process and results in defective dies.

## WHAT IS THE SHEET SIZE?

Standard dies sheets have a usable space of approximately 14 x 24 inches. Estimations may be given based on die size, but final yield calculations are determined only by our graphics team.

## WHAT ARE THE COSTS?

The prices you pay for dies depends on your customer level. Contact for detailed pricing.

**New Design Setup:** Each new design is charged a one time setup fee to cover the cost of printing a film and registering a new design in our system.

**Dies:** Contact for detailed pricing.

**Shipping:** There are no additional shipping and handling fees, we pass our freight charges directly to our customers. Charges vary based on carrier, location, order size, etc.

**Design Support:** If you need additional design support in preparing your files, designs services are available at an additional \$35.00/hour.

**Customizations:** Additional customizations are available such as magnets, detabbing, and packaging. See previous page.
